

Last Name	First Name		Department	Address	Email	Phone	Specialty
Bae	Insoo	Ph.D.	Assist Professor, Oncology		lb42@georgetown.edu	7-5267	to identify environmental factors that increase breast cancer risk
Banerjee	Partha	PhD	Assist. Professor Biochem/Mole & Cell	C406B, Med-Dent Bldg	ppb@georgetown.edu	687-8611, 687-3534	
Bellanti	Joseph	MD	Prof, Peds and M & I	GUMC	bellanti@georgetown.edu	687-8227	See separate sheet
Byrne	Celia	Ph.D.	Assist Professor, Oncology	S-148, Lombardi Cancer Center	Cb252@georgetown.edu	687-7645	Cancer Genetics and Epidemiology Program in the Department of Oncology
Clarke	Robert	PHD, DSc	Oncology/Physiology	W405A Research Bldg	clarker@georgetown.edu	687-3755	oncology/physiology
Cleary	Kevin	PhD	ISIS Center GUMC Assoc. Prof	2115 Wisconsin Ave, NW, Suite 603, Wash DC 20007	cleary@georgetown.edu	687-8253	Interventional Radiology
Cole	Marilee	MD, DTMH	Professor of Medicine, Gen Internal Medicine	6 PHC	Mcole01@georgetown.edu	444-8168	Director, Tropical Medicine Elective
Colon	Angel Rafael				colona@georgetown.edu		Currently in certification and publishing...degrees, training and areas of expertise include: pediatric gastroenterology, history and philosophy of western medicine and art history. "melding the humanities and medicine".
Deeken	John	MD		Podium B, Lombardi	deekenj@georgetown.edu	444-3958	head and neck cancer, pharmacogenomics, drug-drug interactions, and cancer stem cells.
Dritschilo	Anatoly	MD	Professor and Interim Director, Lombardi Cancer Center	E202A-B, Research Bldg	dritscha@georgetown.edu	687-2144	Medicine, radiation biology, cell biology, carcinogenesis and molecular modeling.
Duane	Marguerite R.	MD, MHA FAAFP	Assist Professor, Family Medicine	Clerkship Director, Family Medicine; 205 Kober-Cogan	mrd35@georgetown.edu	202-687-1180	I am interested in serving as a mentor for students interested in clinical research. My particular areas of interest include the care of chronic disease, prenatal care, and residency education training.
Dutton	Mary Ann	PhD	Dept of Psychiatry Prof and Assoc Director, GUMC and Center for Trauma and the Community	620 Kober Cogan	Mad27@georgetown.edu	687-1997	I could provide supervision for students to do papers, using secondary analysis of data from 4 different studies pertaining to intimate partner violence and low-income, minority populations. Variable categories include health and mental health outcomes, coping, health care utilization, use of community systems. Some data sets include immigrants, 1 data set includes men and women. Student needs

							some experience using statistical program (SPSS or other program). Intent is to develop manuscript to be submitted for publication.
Evangelista	Rebecca	MD	Clerkship Director, Dept of Surgery		Rse9@georgetown.edu	202-444-2705	
Friedman	Rhonda	Ph.D.	Professor, Neurology Dir, Ctr for Aphasia Research and Rehab; Dir, Cognitive Neuropsychology Lab	203B, Bldg D 207 Building D	friedmar@georgetown.edu	784-4134	aphasia and alexia cognitive deficits following stroke language deficits in dementia cognitive deficits in dementia cognitive rehabilitation of language/cognitive deficits
Fugh-Berman	Adriane	MD	Assoc professor, Physiology and Biophysics	229, Basic Science Bldg	Ajf29@georgetown.edu	687-7845	we'd be happy to work with a medical student on one of or investigative projects on the pharmaceutical industry. I've attached a sheet that we did for interns; another project I would like a med student to work on is the industry effort to fight proposed laws in several states to ban prescription data sales by pharmacies, and teh limitations of the AMA Prescription Data Restriction Program. See attached sheet.
Gagnon	Gregory	MD	Chief of Service for Radiation Medicine	LL Bles	gagnong@gunet.georgetown.edu	444-3335 Asia Hameed 444-6665	
Glazer	Robert	PhD	Professor, Oncology	W318, Research Bldg	glazerr@georgetown.edu	687-8324	Oncology: the molecular aspects of tumorigenesis and drug development
Hauser	Gabriel	MD, MBA	Dept of Pediatrics, Vice Chair	C5414 CCC Bldg	hauserg@georgetown.edu	444-2468	Pediatric Intensive Care. I can mentor students in projects that involve literature search and writing of in-depth review of specific topics, or a small clinical project.
Holzheimer	Quinn		attending faculty physician in emergency medicine,		quinnhh1@yahoo.com		my areas of interest are patient/physician/nurse rapport, asthma, tobacco and cocaine abuse/cessation, pain management, pain control, physician self-assessment, and the judicious use of laboratory tests.
Johnson	Lynt	MD	Chief, Transplant Institute, Surgery	2 Main Hospital	johnsolb@georgetown.edu	444-4557	
K. William	Harter	MD	GUH Clinical Director for Radiation Medicine	LL Bles	harterk@gunet.georgetown.edu		1)Clinical research project for a medical student in Head&Neck cancer; likely to result in publishable manuscript. 2)(If appropriate) - I would be pleased to mentor

							a project in the areas of History of Medicine/History of Science (I was a university historian prior to medical school)
Katz	Kathy	MD	Associate Professor, Child and Human Dev.	415 Kober-Cogan	katzk@georgetown.edu	687-8778	I am a pediatric psychologist with expertise in developmental disabilities, child mental health, teen pregnancy, and premature birth. I will be away most of August, but will check email periodically.
Kessler	Craig	MD	Director, Hematology group	Lisa Jacobs, MBA Program Administrator Hematology(B9)/Hemophilia Program Lombardi Cancer Center	kesslerc@georgetown.edu	jacobs12@georgetown.edu 202-687-4861	We have a comprehensive program that can offer interested students exposure to our clinic work, research studies, and laboratory activities and to work with an experienced staff.
Landy	Helain J.	MD	Chair, Department of Obstetrics and Gynecology Director, Fellowship in Maternal-Fetal Medicine	(3PHC)	Helain.J.Landy@Medstar.net		Administrative: Robin Reath, Administrative Assistant (rar9@gunet.georgetown.edu) 202-444-8757; Fax 202-444-1472 MFM Fellowship: Antoinette Perry, Fellowship Coordinator (perryal@gunet.georgetown.edu) 202-444-8533; Fax 202-444-4018
Laredo	James	MD	Vascular surgeon;Dept. of Vascular Surgery	4 PHC	jxlv@gunet.georgetown.edu		Vascular Surgery Arterial disease Aneurysmal disease Venous disease Intimal hyperplasia Endovascular Interventions
Larsen	Jeanne	MLS	Assistant Dir, Reference and Research, Dahlgren Library	GM-7, Preclinical Science	larsenje@georgetown.edu	687-1783	I routinely provide students, faculty, and staff with reference and research assistance, including help with search strategies for databases, how to use specific resources, how to find information, and more. Myself and other librarians teach classes on resources, too. If a basic sciences or clinical faculty member worked with several students, perhaps I could co-mentor with s/he.
Ling	Shari	MD	NIA-IRP	Clinical Research Branch, NIA-IRP, 3001 S. Hanover Street, Baltimore,	LingSh@grc.nia.nih.gov	410-350-3934	Staff Clinician

Lo	Steven E.	MD	Assistant Professor of Neurology	MD 21225 Georgetown University Hospital, PHC 7th Floor	SEL107@gunet.georgetown.edu	Ph: 202 444-1762 or 444-2788 Fax: 202-444-2661	Dept of Neurology, Division of Movement Disorders
Love	Jeff	MD	Professor, Emergency Medicine	Residency Program Director, Emergency med	Mike Ybarra, another contact: mybarra@gmail.com he is part of the EM Interest Group		Emergency Medicine Research Consortium Contact: Nancy Kenny, research coordinator: 202-877-8080, Washington Hospital Center—possibility of research projects at several sites.
Martin	Mary Beth	PhD	Professor, Oncology, Biochemistry	E411A New Research Bldg	martinmb@georgetown.edu	687-3738	Hormone-dependent cancer, etc.
Massaro	Donald	MD	Lung Regeneration Lab	RM GM-12D, preclinical sci	massarod@georgetown.edu	7-4934	I would be very happy to act a a mentor for a students independent research project. Our work uses animal models of human diseases, e.g., chronic obstructive pulmonary disease, the fifth leading cause of death world wide, expected to rise to 3rd by 2020. Our aim is to develop treatments that will reverse the disease. As a result of our work (see attachment, we are the US scientists referred to) Roche has instituted a large multicenter, multicontinent clinical trial of a derivative of vitamin A to reverse lung damage in COPD.
Matsumoto	Cal S.	MD, FACS	Assistant Professor of Surgery	Georgetown University Hospital Transplant Institute Washington DC	CSM5@gunet.georgetown.edu		I would be more than happy to participate in this. I have many clinical projects/studies that would fit in with any student research project. I look forward to hearing from you as to the status of this.
Merenstein	Daniel J	MD	Director, Research Division, Family Medicine	220-Kober-Cogan	Djm23@georgetown.edu	687-2745	In general, I do Complementary and Alternative (CAM) clinical trials, a lot of emphasis on food (probiotics, chamomile), pediatric studies, respiratory illnesses and prevention.
Moore	Eileen	MD	Assistant Professor, General Internal Medicine	NE 113, Med-Dent Bldg	moorees@gunet.georgetown.edu	687-1640	Advocacy/access to care/health disparities; professionalism; ethics (end of life, informed consent, patient/physician communication)

Motamedi	Gholam	MD	Associate Professor, Neurology	Director, Clinical Neurophysiology Fellowship Program, Director, Epilepsy Service GUH PHC 7	motamedi@gunet.georgetown.edu	202-444-4564	I will be happy to help as I already have several GU med students working with me on research projects.
Neville	Richard F.	MD	Chief, Division of Vascular Surgery	4 PHC	neviller@gunet.georgetown.edu	ph 444-2255 fax 444-6498	We have several clinical research projects in vascular disease that students could participate inmostly evaluation of clinical results.....some basic science
Padmanabhan	Radhakrishnan	PhD	Professor, Micro & Immuno	SW 309, Med-Dent Bldg	Rp55@georgetown.edu	687-2092	My expertise is in the field of virology especially those causing emerging infectious diseases such as Dengue, West Nile virus, and Yellow fever virus. I would be happy to participate in mentoring students who are interested in this area for independent study. I have had medical students who worked in my laboratory in short term research in the past when I was a faculty at Univ. of Kansas Medical Center.
Plankey	Michael W.	Ph.D.	Assistant Professor of Medicine, Department of Medicine Division of Infectious Diseases	2233 Wisconsin Avenue, NW, Suite 214 Washington, DC 20007	mwp23@georgetown.edu	202-784-2607 (office) 202-784-0791 (FAX)	I am an infectious disease and nutritional epidemiologist working with the Women's Interagency HIV study -WIHS (GU is one of the six US sites) and in collaboration with Johns Hopkins University Department of Statistical Epidemiology as co-investigator for the Multicenter AIDS Cohort Study (MACS). For more information about each cohort study, please visit: (WIHS) https://statepiaps.jhsph.edu/wihs/ (MACS) http://www.statepi.jhsph.edu/mac/mac.html
Psychiatry	Dept				Bonnie Green, bgreen01@georgetown.edu Joyce Y. Chung, chungjy@georgetown.edu		
Rabin	David	Md, MPH	Research Prof, Family and Community Medicine	301 Kober-Cogan	rabind@georgetown.edu	687-1608	Areas of interest that I would be willing to work with are: Health care financing - aspects of financing that affect patient well being, policy issues in health care reform, single

							<p>payer insurance system, universal access to care, health professional knowledge of issues in health care reform.</p> <p>Comparative health systems - comparisons of US health system performance or characteristics to that of other developed nations</p> <p>Developing nations - issues of medical service provision, health manpower, health care financing</p>
Roberts	Barbara	PhD	Department of Psychiatry	602-C Kober-Cogan Building	Btr2@gunet.georgetown.edu	Phone: 202-687-2851 Fax: 202-687-6658	My specialty area in the field of psychiatry is chemical dependency and dual diagnosis: chemical dependency and mental illness. The dynamics for exploration in these areas should prove compelling to students as a focus of study--especially the impact of addictions in minority populations.
Roepe	Paul	Ph.D.	Professor of Chemistry, Professor of Biochemistry & Cellular and Molecular Biology, Co - Director, Center for Infectious Disease		roepep@georgetown.edu	687-7300	Happy to help. Areas of expertise are: infectious disease (particularly parasitic, e.g. malaria) physical chemistry (spectroscopy; principles of NMR, MRI, PET, etc.) drug resistance drug design / drug discovery
Roesch	Darren	Ph.D.	Assistant Professor of Medicine	393 Bldg D	roeschd@georgetown.edu	Mobile: (202) 412-2058 Fax: (202) 318-0767	I do basic science research that focuses on sex differences in adrenal endocrinology (as is relates to hypertension and obesity) and I also study the effects of pregnancy on drug pharmacokinetics and pharmacodynamics. Studies in my lab are conducted using rats, mice and/or guinea pigs.
Scribanu	Nina	MD	Peds?		scribann@georgetown.edu		
Shields	Peter	MD	Professor, Medicine & Oncology	LL Level, RM 150, Lombardi	Pgs2@georgetown.edu	687-0003	Go to one of these links: Program: http://lombardi.georgetown.edu/research/areas/cancer/genetics/index.htm Lab: http://lombardi.georgetown.edu/labpage/Lab-Detail.cfm?userID=360
Sidhu	Anita	PhD	Head, Lab of Molecular Neurochemistry	W222, Research Bldg	sidhua@georgetown.edu	687-0282	See separate sheet

Singer	Andrea	MD	Assoc Professor, Medicine	3 PHC	singeraf@gunet.georgetown.edu	444-8531	
Spies	James	MD	Professor of Radiology Chairman and Chief of Service Department of Radiology, CG 201		spiesj@gunet.georgetown.edu	444-3450	I am an interventional radiologist and my particular area of interest is fibroid embolization and other minimally invasive therapies for uterine fibroids and the assessment of patient outcomes.
Steinberg	John S.	DPM	Assistant Professor, Department of Plastic Surgery	Georgetown University Hospital 3800 Reservoir Road NW 1st Floor - Limb Center Washington DC 20007	steinberg@usa.net	202.444.3059 phone 202.444.5391 fax	I would be happy to assist in student research in our practice at GUH which chiefly involves Diabetic Wound Healing and Lower Extremity Limb Salvage.
Subramanian	Siva	MD	Professor of Pediatrics and Obstetrics Chief, Neonatal Perinatal Medicine		subramas@gunet.georgetown.edu	444-8709	My areas of interest are clinical related to the Neonatal Intensive Care Unit - Infant mortality reduction, nutrition, Infant morbidities and Ethics.
Suzuki	Yuichiro	Ph.D.	Assoc Professor, Pharm, GUMC		Ys82@georgetown.edu		Pulmonary Hypertension
Tercyak	Kenneth	Ph.D.	Assistant Professor of Oncology & Pediatrics		tercyakk@georgetown.edu		areas of interest = Biobehavioral cancer/tobacco prevention and control in children and families; genetic testing; impact of acute and chronic illness and illness risks on child, adolescent, and family development; health promotion; pediatric psychosocial oncology; pediatric cancer survivorship. websites = http://lombardi.georgetown.edu/research/areas/cancercontrol/pediatric.htm and http://explore.georgetown.edu/people/tercyakk/?PageTemplateID=147
Toretsky	Jeffrey	MD	Assoc Professor	W311 Research Bldg	Jat42@georgetown.edu	687-8655	
Wall	Russell T	MD	Professor and Program Director Department of Anesthesia	Georgetown University Hospital	wallr@gunet.georgetown.edu	Ph: 202-444-5128 fax: 202-444-8854	Professor and Program Director Department of Anesthesia
Whelton	Sean	MD	Medicine clerkship director, Dept of Medicine, Rheumatology,	G1008 Gorman Bldg	wheltosa@gunet.georgetown.edu	687-8233	Developing tools and programs for the internal medicine clerkship.

			Immunology and Allergy				
Wong	Kenneth	PhD	ISIS Center GUMC Asst. professor	2115 Wisconsin Ave, NW, Suite 603, Wash DC 20007	Khwh3@georgetown.edu wong@isis.georgetown.edu	784-1521	Interventional Radiology--Medical physics (PET/SPECT, CT, radiation medicine) and biomedical engineering (tracking/localization systems, computer-aided interventions).
Woytowicz	Catherine	PhD	Adjunct prof to Georgetown; GW University Dept of Chemistry	725 21 st St, NW Room 110 Washington, DC 20052	drcat@gwu.edu	994-6479	I could work with students on almost any science and public policy issue.
Wall	Russell	MD	Director, Resident Education, Professor, Vice Chair, Dept. of Anesthesia	LL CCC bldg	When writing to him, put "Independent Study" in the subject line. wallr@gunet.georgetown.edu		Research opportunities: 1. Ethics in the Surgical Arena 2. Business in Medicine Other projects as well.
